First preselected reporting case: seed 1301, world 0, decision 12
All four addressed local grids; source and W interventions with exact restoration

Baseline | Current A donor | A restored | W changed (synthetic) | W restored

A-view current record red localization

A-view current record blue localization

W comparison record red localization

W comparison record blue localization

Each tile: n0 n1 / n2 n3

Supplied localization mass: 0.0 0.2 0.4 0.6 0.8 1.0

Colors show supplied localization mass on the same 0–1 scale. Each labeled tile is a separate 4×4 grid.
The A-view combines copied W11 records with the A estimate at n3. W changed uses the saved synthetic time-13 branch.
